Records Retention Schedule

Edition: August 2026

Schedule Number: 2026-0006

Agency: Oregon Department of Forestry

Division: Agency Administration

Program Description

The Agency Administration Division's purpose is to provide accountability and oversight of the agency's administrative functions in compliance with Oregon Revised Statutes, Oregon Administrative Rules, Board of Forestry policies, and State Government Expectations. This division provides critical support to all areas of the agency, setting guidance, and leadership in the execution of the agency's mission.

Agency Administration Division consists of all administrative programs of the agency including Equipment and Motor Pool, Facilities, Information Technology, Federal Grant Support, and Public Affairs. This division, along with the other operating divisions, are responsible for policy development, interpretation of statutes, legislative proposals, and program alignment necessary to carry out the mission of the Board of Forestry and the Department to protect and promote resilient forests that benefit all Oregonians.

Program: Public Affairs

Program Description

The Public Affairs Program tells ODF's story and helps the department's broad array of stakeholders connect with and understand the department's core business areas. It does this by establishing department-wide policies and procedures for communications activities, and supporting and assisting divisions and programs in sustaining, enhancing and expanding their communications efforts.

The Public Affairs Program is responsible for public relations activities of the Oregon Department of Forestry. Responsibilities include internal and external communications, media relations, management of external website and agency social media accounts, and coordination and fulfillment of public records requests. The program, in conjunction with the Tillamook Forest Center and Forest History Center, maintains records pertaining to the history of the Oregon Department of Forestry.

Program Records

025 Public Affairs Photographs of events and persons, 1911 - [ongoing] 1 c.f.

Agency: Oregon Department of Forestry
Division: Area
Program: District Offices

Program Description

Areas, districts, and units act as centers of operation and information on behalf of the Oregon Department of Forestry. ODF is organized into three areas of operations each containing multiple districts and units. Areas and districts are staffed on a full time, permanent basis. Some units are staffed on a seasonal basis. Areas, districts and units house the field operations of programs headquartered in Salem and are dedicated to the management and protection of state forest lands and private forests. Responsibilities include managing state forest lands and ensuring safe and productive forest lands throughout the state. Staff also oversees forest operations, harvesting, reforestation and compliance with the Forest Practices Act. Fire protection also constitutes a major portion of the duties and responsibilities of area, district, and unit offices. Monitoring, smoke management, and firefighting are all essential components of the Protection from Fire program in areas, districts, and units.

Program: Forest Health

Program Description

Forest Health is responsible for the research and prevention of insect and disease impact on forestlands throughout Oregon. Forest Health conducts surveys, provides evaluations, and monitors forest insects and tree diseases. This program performs research activities on insect and disease development and expands upon various activities within Oregon's forestlands to manage insect populations and disease that may be detrimental to forest health. The Forest Health team utilizes and develops current methods for insect and tree disease control throughout the state. Funding includes but is not limited to federal forest grants. This program is an asset to both private and public landowners.

Program: Monitoring

Program Description

Monitoring ensures high water quality by conducting monitoring and research internally and with partners to protect drinking water and fish habitat from unnecessary human-caused impacts. This program embraces statutory requirements to conduct research and monitoring to verify that current forest management practices are protective and develop new rules or policies to maintain water quality and fish habitat. Within Monitoring are the Compliance Monitoring Program (CMP) and Adaptive Management Program (AMP). CMP develops studies to evaluate state-wide landowner compliance rates with the Forest Practices Rules (Div. 678). CMP works closely with ODF foresters, subject matter experts, the CMP Committee (CMPC) and a contracted statistician to plan, strategize, and implement compliance monitoring studies. AMP evaluates whether forestry practices are meeting their goals to protect natural resources through a science-based and transparent process (Div. 603). The AMP Committee (AMPC) guides the overall policy and process, and the Independent Research and Science Team (IRST) coordinates research in support of policy decisions. The committees make recommendations to the Board of Forestry on any proposed rule changes.

Agency: Oregon Department of Forestry

Division: Protection from Fire

Program Description

The Protection from Fire Program is Oregon's largest fire department responsible for providing protection from fire to 16.2 million acres of private and public forest lands. The Program focuses on fire prevention, investigation, suppression, and fuels management to reduce or mitigate incidents of wildland fires in Oregon.

The Protection from Fire Division of the Oregon Department of Forestry is divided into two sections: Operations and Policy and Planning. The Program includes all Protection from Fire Division sections and forest protection districts as designated under ORS 477.225 with wildland fire protection responsibilities. Other agencies and agency partners may participate as part of the Protection from Fire Program through contract or agreement.

Agency: Oregon Department of Forestry
Division: Protection from Fire
Program: Operations
Unit: Fire Operations

Program Description

The Fire Operations Unit is comprised of the Fire Cache, Salem Coordination Center (SCC), and Protection Contract Services (PCSU). The Fire Operations Unit is responsible for the logistical planning and operation tasks of the Department of Forestry fire suppression personnel/teams.

ODF Fire Cache provides statewide logistical support to the Department's Incident Management Teams, forest protection districts as designated under ORS 477.225, and other state and federal agencies in their efforts toward wildland fire suppression and other emergency operations. Fire Cache provides trained personnel, equipment, and supplies to any location throughout Oregon and cooperating states. SCC coordinates fire dispatching operations and mobilization of state and national level wildfire resources in accordance with established policies and guidelines. SCC position plays a key role in maintaining the complete and coordinated statewide protection from fire system.

Private contractors provide an array of firefighting resources to ODF and its partnering agencies for wildfire mitigation, including hand crews, water handling/heavy equipment, medical units, security services, mobile kitchens and more. These assets and services are secured by ODF Call-When-Needed (CWN) Incident Resource Agreements (IRA). PCSU manages these agreements and contracts with ODF partners.

Agency: Oregon Department of Forestry
Division: Protection from Fire
Program: Operations
Unit: Geographic Information Systems (GIS)

Program Description

The overall agency Geographic Information Systems (GIS) Unit is responsible for systems administration, development, and maintenance of enterprise GIS data that is widely used throughout the Oregon Department of Forestry (e.g., hydrography, transportation, administrative boundaries, etc.). GIS is a mapping, analysis, and data management technology that is used widely to inform business decisions and support Protection from Fire Division operations. GIS connects data to maps by integrating spatial data (where things are) with tabular data (what things are like) to help users understand patterns, relationships, and geographic context. In addition to traditional data visualization tools (e.g., maps and graphics), GIS also uses web-based tools to serve information in more interactive platforms such as websites, dashboards, applications, and survey forms.

Agency: Oregon Department of Forestry
Division: Protection from Fire
Program: Operations
Unit: Incident Management Teams (IMTs)

Program Description

Incident management team (IMT) is a term used to refer to a group of highly trained personnel that respond to an emergency. Although the incident management team concept was originally developed for wildfire response, it has been expended into what is now known as "All-Hazards Incident Management Team". An All Hazard IMT can respond to a wide range of emergencies including fires, floods, earthquakes, hurricanes, tornadoes, tsunamis, riots, spilling of hazardous materials, and other natural or human-caused incidents.

The Oregon Department of Forestry proudly fields three Incident Management Teams that are utilized primarily for wildfire emergencies within Oregon but have also been mobilized to fellow states and internationally for wildfires, hurricanes, pandemic response, flooding, cyber-attacks, and winter ice storms.

Program: Administration

Program Description

The State Forests Program is responsible for actively managing Oregon's public forest lands to provide economic, environmental and social benefits for all Oregonians.

Staff are responsible for the administrative duties of the State Forests Program as well as maintaining communications between the program and other ODF programs. The unit maintains policies, procedures, and orders directed at improving the Forest Management aspects on Oregon forestlands. In addition, records created and maintained reflect policies and procedures generated by the leadership of the Forest Management Division and State Forests Program. Staff are also responsible for compiling information and advising Department of Forestry personnel on short- and long-term activities and projects related to policy and planning and the development of management plans. The unit maintains relationships with public and private institutions (including the public) regarding issues involving Department of Forestry policies and procedures. Forest Management Plans are established as Oregon Administrative Rules. The unit develops and maintains Comprehensive Recreation Management Plans.

Records Retention Schedule

Edition: August 2026

Schedule Number: 2026-0006

Agency: Oregon Department of Forestry
Division: State Forests
Program: Biological Support

Program Description

The Biological Support Unit is responsible for ensuring minimal negative environmental impact on state forestlands and managing habitat for fish and wildlife (especially threatened and endangered species). The unit is responsible for the coordination of federal and state endangered species act compliance and forest management plan implementation with regard to wildlife habitat, and strives to provide information to field managers and policy makers. In addition, the unit conducts watershed analysis and training for ODF's State Forests Program.

Program Records

198 Threatened and Endangered (T and E) Wildlife Survey Records, 1960 - [ongoing] 2 c.f.

- (a) Retain survey analysis records and reports permanently, transfer to State Archives after 20 years
- (b) Retain survey data 20 years, destroy

Records Retention Schedule

Edition: August 2026

Schedule Number: 2026-0006

Agency: Oregon Department of Forestry
Division: State Forests
Program: Information
Unit: Information

Program Description

The Information Unit is responsible for monitoring the forest resource activities of the Department of Forestry in an effort to determine the effectiveness of Oregon's Forest Management Plans. The unit inventories species in state forests, conducts research monitoring and manages and provides information and data. Inventories include information on the estimated volume in timber stands, the species present and the structure of the stand. The unit organizes data and observations in order to present an accurate view of Oregon's forest resources to the State Forests Program. The State Forests Program and the Forest Management Division then use the tabulated information to construct planning and operational activities to best ensure the health of Oregon forest lands. The unit does forest modeling work for the department which assists in strategic planning.

Agency: Oregon Department of Forestry
Division: State Forests
Program: South Park Camp

Program Description

South Fork Camp is a work camp run cooperatively by the Department of Forestry and the Department of Corrections for adults in custody. The camp was established in response to the Tillamook Burn Rehabilitation Program and under ORS 421.450, which allows for the establishing of forest work camps. The Department of Forestry can utilize adult in custody labor in a productive and mutually beneficial manner, with adults in custody gaining technical skills and work experience while completing their sentences. The facility can house and manage a maximum of two hundred adults in custody. On average seven hundred adults in custody process through the center every year. Projects including on- and off-site construction, fish hatchery maintenance, firefighting, tree planting and brush clearing. Projects are organized and directed by camp staff. South Fork fields crews provide services to eleven counties. Crews are under the direction of Forest Crew Coordinators. The Department of Corrections furnishes security and operates the camp as a minimum-security facility maintaining records and documentation on individual adults in custody. Department of Forestry controls and manages crews during the four ten-hour workdays.

Program: Tillamook Forest Center (TFC)

Program Description

The Tillamook Forest Center (TFC) is a public facility designed to educate the general public through interpretive exhibits and programs on Oregon forest practices and resources, wildfire prevention and protection, and the history of the Tillamook State Forest and the Tillamook Burn. The Center opened April 1, 2006. A mix of public and private monies fund the TFC. Private funding sources includes the State Forests Trust of Oregon, a non-profit corporation. Volunteers aid in the operation of the gift shop, grounds work, educational and interpretation programs.
