APPROVED BY:

Kate Nass, Chief Financial Officer | Approval on File

Statement

This is the state's policy on protecting the integrity of payroll data.

Applicability

This policy applies to all state agencies that are subject to the Oregon Accounting Manual (OAM), as outlined in [OAM 01.05.00, Introduction: Scope and Applicability](#). If any provisions of OAM policies or procedures conflict with collective bargaining agreements, the provisions of collective bargaining agreements would supersede OAM guidance.

Definitions

Refer to [OAM 65.00.00, Glossary](#) for definitions.

Policy

101. In order to protect payroll data integrity, agencies must reconcile their Workday Payroll System reports to the Statewide Financial Management Application (SFMA) and agency specific accounting systems.
102. Agencies that make coding structure changes such as PCA or index before batches are posted to SFMA or agency specific accounting systems must maintain an audit trail for those changes. The audit trail must consist of a record of before and after the changes and must be approved by agency management. The structure changes must reconcile to, and balance with, the source Workday Payroll System (XREF) report titled **PAY | Summarized Cost Allocation by Agency, Cost Center, Grant, Project – Matrix**. The reconciliation must disclose or document proof that the results of the changes in SFMA and other accounting systems agree to the source documents. Further, those changes must be annotated upon the Workday Payroll System XREF report, or documented in another way, to create backup documentation that reflects the changes made to the SFMA batch. SFMA does not allow dollar amount changes to this information.
103. While agencies have the ability to make PCA and index changes in SFMA where there is a cost benefit, agencies should strongly consider making needed adjustments as separate adjusting entries only after the initial batch has been posted. This method of making PCA and index changes creates a more precise audit trail.
104. To accommodate some agency requirements where subsidiary systems house further allocation of staff time, the Workday Payroll System provides a file of payroll data to the agency. This process does allow for total dollar changes. It is the responsibility of the agencies receiving these files to verify the final file totals the same amount as the original file produced by Workday Payroll System. Files with different totals create a serious agency lack of controls. Continued discrepancies between the total amount of the original file and the final file may jeopardize the use of this practice for the agency.
105. Per [*OAM 45.15.00 Payroll: Payroll Accounts Reimbursement*](#) Statewide Financial Management Services (SFMS) has the responsibility to reconcile the Workday Payroll System run information to SFMA accounts receivable information by agency. This reconciliation takes into consideration agency timing requests for the second payroll run.
