Discussion/interpretation

Eligible Oregon Project Independence – Medicaid (OPI-M) individuals are required to participate in case management services, risk assessments, risk monitoring activities and the person-centered service planning process (OAR [411-016-0025](#)).

Services Case Managers (SCM) are responsible for completing the risk assessment, risk monitoring and documenting all case management contacts (OAR [411-016-0010\(c,i\)](#)).

Direct and indirect contacts are defined in [OAR 411-028-0020](#). More information including definitions from rule and examples on how to document contacts in Oregon ACCESS (OA) can be found in this [guide](#).

OPI-M frequency of contacts does not follow the same requirements as Waivered Case Management. The frequency of direct contacts is determined as follows:

- For all individuals receiving OPI-M, a minimum of quarterly direct contacts is required:
 - Using person-centered processes, determine an agreed upon direct contact frequency with the individual, no less than quarterly.
 - Document the direct contact frequency in the Person-Led Assessment & Notice (PLAN)
- Participate in monthly contacts if one or more high risks are identified on the risk assessment.
 - Document the direct contact frequency in the Person-Led Assessment & Notice (PLAN)

Type A and Type B funding is DIRECTLY tied to the documented case management contacts, by reimbursing AAAs for each of these documented contacts each month up to a budget cap. It is critical case managers document these contacts for the AAAs to receive the appropriate funding. If contacts are not made, Oregon will lose access to Medicaid funds that are intended to support the AAAs which will mean less funding for the AAA.

Implementation/transition instructions

Type A and B AAAs: SCMs must document **all** contacts (direct and indirect) to accurately receive case management payments for OPI-M. This will likely mean that CMs will be documenting more than one contact per month per OPI-M consumer.

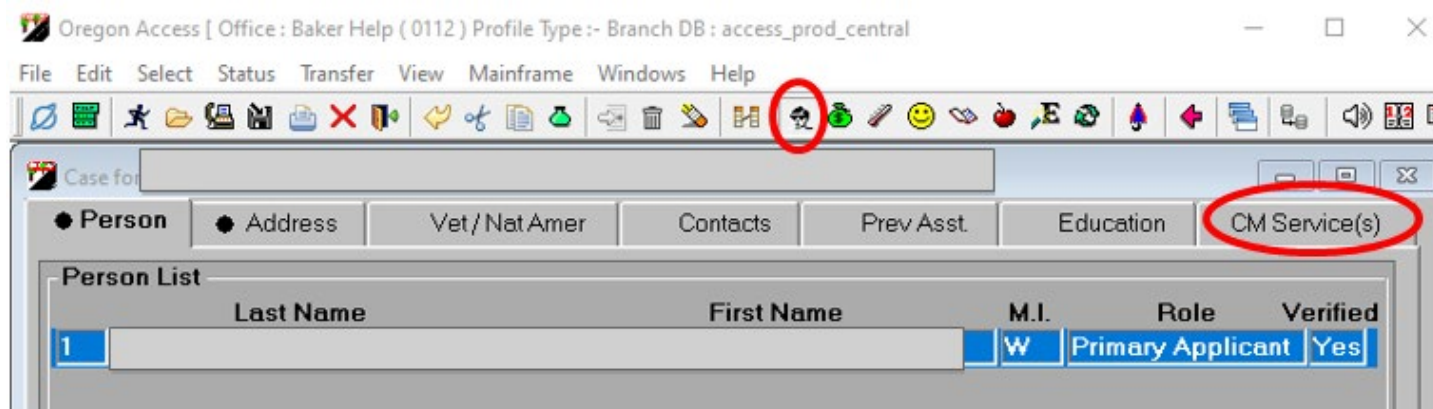

NOTE: Tier 1 users (case managers) can enter contacts up to the first of the previous month. SCMs should retroactively enter the contact under CM Services and enter a narration with the date of the original contact.

Example: SCM originally narrated on 9/3/25 of their home visit to complete the PLAN and no CM service was entered at that time. Enter CM service and enter narration with direction to the original contact.

Narration example: Please see narration dated 9/3/25 for CM contact.

APD: SCMs must document direct contacts for OPI-M cases they continue to serve.

Follow the existing [definitions and examples](#) of waived case management for entry into OA and documenting in the CM Service(s) tab in Oregon ACCESS (OA).

“OPI-M Services” is required when entering all OPI-M contacts. Add additional services if they are relevant to the type of contact. When entering contacts, you will be required to enter a narration that corresponds to the contact made.
